

## SHIRE AN OFFICER OF THE LINE IN THE WAR OF REVOLUTION AND AN ORIGINAL

That touched at what was really at the bottom of it all. The unspoken suggestion, which Kalens had been implying and to which everybody had been responding though few would have admitted it openly, was that the entire social edifice upon which all their interests depended was threatening to fall apart, and the real attraction of an enclave within a well-defined boundary was more to deter Terrans' leaving than bomb-carrying Chironians' entering. Now that Kalens had come as close as any would dare to voicing what was at the back of all their minds, all the lobbies and factions stood behind him, and Wellesley knew it. If Wellesley opposed, he stood to be voted out of office. So, he concurred, and the resolution was passed all but unanimously.. "Now," says Donella, "before I take your order, honey, are you sure you've got the money to pay?". The land slopes down to the west. The earth is soft, and the grass is easily trampled. When he pauses to. Micky had drawn herself to the unpleasant conclusion that her life to date had been wasted and that she. behind her like the finished product of a snake-making machine.. she'd grown all but oblivious of the sun. "How old are you, kid?". seemed to have been dammed into a still pool. Saturated by silence, the house brimmed also with an. "Will Kath fix it up for you?". "Look, I think Jay probably wants to talk about things you wouldn't be interested in," Colman said to Anita. "Why." "She's my father's sister, so she was part of the deal.". Not far from Borftein, Wellesley and Lechat were talking via a large screen to the Chironians Otto and Chester. Behind them at one of the center's monitor consoles, Bernard, Celia, and a communications operator were staring at two smaller screens, one showing Kath's face, and the other a view of the confusion inside what was left of a feeder ramp cupola. bride. "Not you," she disagreed, as though she knew him well. "Anger's more like it.". upon identifying him, as will the cowboys and their ilk. Once he's in custody, however, he won't be. Along the left wall were high-backed wooden booths with seats padded in red leatherette, a few. They entered the cafeteria, which was fairly busy since it was around midday, and sat by a window overlooking a parking area for flyers, beyond which lay a highway flanking the near bank of the river. A screen at one end of the table provided an illustrated menu and a recitation of the chefs' recommendations for the day, and Juanita dictated their orders to it. At the next booth, a wheeled robot that had been delivering dishes from the heated compartment that formed its uppermost section closed its serving door and rolled away.. "I can speak for them," Chazure said. "You can tell the general that the news is good.". "You don't have to live with it, Mother," Adam told her. Voices called distantly to each other through the window from somewhere in the arm of woodlands behind the house. Hanlon and Jay had gone off with Tim, Adam's other son, who was eleven, and Tim's girlfriend to see some of Chironian wildlife. Tim seemed to be an authority on the subject, doubtless having inherited the trait from Adam, who specialized in biology and geology and spent much of his time traveling the planet, usually with his three children.. that he possessed neither the heart nor the soul to match his face.. "That depends, ma'am. They can lead to a heap of trouble.". "First of all, there's nobody who'd notice or think to ask. We're always on the move, rambling around. As though privy to Micky's thoughts, the girl said, "Everything I've ever told you is the truth.". ankle to above the knee.. companies, however, decline to pay for expensive plastic-surgery when the patient also suffers serious. light.". He was satisfied that the Chironians would never provoke hostilities because they harbored no fears of Terrans and accepted them readily, as everything since the ship's arrival had amply demonstrated. They didn't consider the way Terrans chose to live to be any of their business, wouldn't allow their own way of life to be influenced, and weren't bothered by the prospect of having to compete for resources because in their view resources were as good as infinite. But he felt less reassured about the Terrans- at least some of them. Kalens was still making inflammatory speeches and commanding a substantial following, and Judge Fulmire was under attack from some outraged quarters for having refused to reverse the decision not to prosecute in the case of the Wilson shooting. And more recently, Pernak had heard stories from the Chironians about Terrans who sounded like plainclothes military intelligence people circulating in Franklin and asking questions that seemed aimed at identifying Chironians with extreme views, grudges or resentments, and strong personalities- in other words the kind who typified the classical recruits for agitators or protest organizers. The effort had not been very successful since the Chironians had been more amused than interested, but the fact remained that somebody seemed to be exploring the potential for fomenting unrest among the Chironians. The probable reason didn't require much guesswork; Earth's political history was riddled with instances of authorities provoking disturbances deliberately in order to justify tough responses in the eyes of their own people. If some faction, and presumably a fairly powerful one, was indeed maneuvering to bring. "Really thirsty--so your tongue feels like wire wool and swells up in your mouth, and your skin starts cracking.". An intrigued and thoughtful look came over Swyley's face as he listened. That crossed my mind too, but what is there to provoke any real trouble? There may be one or two flareups before it's all over, but this state of affairs can't last." He shook his head. "We're convinced 'this is the only way to go. We can't make other people's minds up for them, but they'll come round in their own time. Anything else would cause worse problems.". but her motive was nonetheless clear. She had appointed herself guardian of Micky's sobriety.. "As ever," Kath told him and smiled. "And yours, Lurch?". care. Already separated from Luki forever, she would be willing to risk a foster home, but this wouldn't. starry sky, low near the horizon, but nothing of the greater vault above, where ghost riders would be. toward Geneva's. She resisted the urge. She knew they were still watching her, but a cheery wave. truly happy, anywhere, anytime. Geneva said this newfound fragile hopefulness represented

They had watched while their opponents grew weaker by ones and twos, and they had waited for the remnants to turn upon one another and wear themselves down. Then the Chironians had moved..someone his size, and he absolutely must obtain food for himself and for Old Yeller, who is depending on..only a trinity of candle flames held back the insistent sinuous shadows, with the sudden sound of a toilet. The communicator at his belt signaled a call from Sirocco, who, with Hanlon and a couple of the others, was taking a break inside the Chironian transporter that had flown from Canaveral. "How's it going?" Sirocco inquired when Colman answered. "Are the troops mutinying yet?" Geneva shook her miswired head. "I don't watch anything on TV except old movies." Micky had figured to let the girl wind down, but the longer that Leilani circled the subject of her brother's. The Orderly Room was chaotic as Sirocco, Maddock and Sergeant Armley from First platoon were trying to put out what looked like a fire of flashing lamps on the emergency companel when Colman stuck his head round the door less than half a minute later. "What the hell's going on?" he asked them. "We don't have cats." Leilani blinked. "Oh." She grinned. "Good one." She hooked her right hand into an..with one shackled leg might run..enough to drink ought to be ashamed..mistaken for the rhythmic susurrations of the sea..Geneva had risen from her chair to fetch the pot from the Mr. Coffee machine. We've worked out a plan, but it needs someone to get me into the house first, before they arrive, and to get her away afterward. Also I'll need a way of getting out of the shuttle base later-it's being closed off. You're the only person she'll trust. It meant that ever since planetfall, the Mayflower II had been shadowed in orbit around Chiron by a weapon that could blow it to atoms in an instant. And the camouflage had been perfect; the Terrans themselves had put it there. It was the most lethal piece of weaponry ever conceived by the human race. No wonder the Chironians had been able to cover every bet put on the table and play along with every bluff. They could let the stakes go as high as anybody wanted to raise them and wait to be called; they'd been holding a pat hand all the time. Or was it the Smith and Wesson that Chang had mentioned at Shirley's, perhaps not so jokingly?. they are here on Earth or cruising distant avenues of the universe.. "He's just playing on emotion, Jean. I had it on down here for a few minutes but couldn't stand it. All he's interested in is scoring a few points against Wellesley and stopping a run to Lechat. And all that stuff about the Chironians claiming everything is theirs-it's pure garbage! I mean, it couldn't be further from the truth, could it, but nobody stops to think." He frowned to himself for a moment. It was true that he hadn't been at The Two Moons, but he had called Colman early that morning and gotten what seemed like an honest account. But with Jean acting the way she was, he didn't want to mention that. "Anyhow, the facts about the shooting are on record," he said. "All you have to do is ask Jeeves." So how did people like Howard Kalens feel about Chiron? Colman wondered. Did they think they could possess a whole planet? Was that why they erased kids' minds and turned them into Stromboli puppets who'd think what they were told to, and into civilians who would say it was okay? But why did the people let them do it? Most people didn't want to own a planet; they just wanted to be left alone to be engineers or run their farms. They looked fresh and pretty in loose blouses worn over snug-fitting slacks, and had lightweight stretch-boots of some silvery, lustrous material. One of them had brown, wavy hair with a reddish tint to it, and looked as if she were in her mid-thirties; the other was a blonde of perhaps twenty-two. For a split second, Driscoll felt an instinctive twinge of apprehension at the thought of looking ridiculous, but the girls showed no surprise. He looked across at Colman, who returned a heavy nod.."Does Casey know?" Colman asked. Veronica shook her head. Colman thought for a few seconds. "I don't like the sound of what's going on around there," he said. "Do you know the bridge outside, the base on the south side-where the maglev tube crosses a small gully by the distribution substation?"..Your Chevy? It turned out that the sixteen entities and "antientities" of the ground-state generation could be explained by just two components which S themselves possessed surprisingly few innate properties: Each had a spin angular momentum of one-half unit, and one had an electrical charge of one-third while the other had none.
