

## CE SUR UN DES PRINCIPES FONDAMENTAUX DE LA DOCTRINE DES PHILOSOPH

that?".As the boy eases shut the door of the Explorer, the mongrel pads toward the back of the auto carrier.,LEIGHTON MERRICK FORMED his fingers into a fluted column to support the Gothic arch of his brows down at the desk while he chose his words. "Ah, I've been looking over your record, Fallows," he looked up. "It shows a consistent attention to detail that is very pronounced . . . everything thorough and complete, and properly documented. It's commendable, very commendable . . . the kind of thing we could do with more of in the Service." "There are some things which we must accept" the preacher thundered..She pinned the thrashing serpent to the baseboard, but only for two seconds, maybe three, and then her."It wouldn't have worked," Wellesley countered. "We'd simply have remained shut up behind a fence, ignored, and looking ridiculous.".smoothing your hair, quell your fear with a cuddle and a kiss on the brow.. "Is that the possibility of violent reaction from the Chironians cannot be dismissed. Therefore we must allow for such an eventuality in considering the future."Just then, two Chironian girls strolled around the corner from the narrow corridor. They looked fresh and pretty in loose blouses worn over snug-fitting slacks, and had lightweight stretch-boots of some silvery, lustrous material. One of them had brown, wavy hair with a reddish tint to it, and looked as if she were in her mid-thirties; the other was a blonde of perhaps twenty-two. For a split second, Driscoll felt an instinctive twinge of apprehension at the thought of looking ridiculous, but the girls showed no surprise. Instead they paused and looked at him not unpleasantly, but with a hint of reserve as if they wanted to smile but weren't quite sure if they should..The man grumbles, turns on his side . . . but doesn't wake..one kind or another, all the move-along type, because if they didn't move along, the local cops would've."Just wondering how I ever took pleasure in this line of work."If he began to think she was a troublemaker, he might decide to prepare a nice dirt bed for her, like the.that had stuck to her skin..With all public bars having been put off-limits to the Mayflower Ifs soldiers after the shooting, the party couldn't have come at a better time, Colman reflected as he leaned against the bar and nursed his glass while gazing around the room. Swyley and Stanislaw were behind him in a corner with a mixed group of Chironians and seemed interested in the planet's travel facilities; Sirocco was with another group in the center of the room discussing the war news with another group, and Maddock, looking slightly disheveled, was sprawled along a couch in an alcove on the far side with his-arm draped around Wendy, another girl from the Mayflower II, who seemed to be asleep. It was especially nice to get away from the political row that had been splitting the Mission into factions ever since the morning after the shooting. Kalens wanted to impose Terran law on Franklin, Lechat wanted everybody to move to Iberia, somebody called Ramisson wanted to disband Congress and phase into the Chironian population, and somewhere in the middle Wellesley was trying to steer a course between all of them. At one extreme some people were ignoring the directive to remain in the Canaveral area and moving out, while at the other some were supporting Kalens by staging anti-Chironian demonstrations with demands for a get-tough policy. Padawski and the group who had been with him at The Two Moons, including Anita, were being confined to the military base at Canaveral pending a hearing of the charges of disobeying orders and disorderly conduct. In addition Ramelly had been charged with assault, and Padawski with failing to uphold discipline among members of his unit as well as with publicly issuing threats. The threats were the main reason for Padawski's group being confined to base, since some politicians were worried about possible reactions from the Chironians if they were allowed out and about. Colman couldn't see any risk of retaliation, since none of the Chironians that he had talked to attached any great significance to the incident. He only wished more of the politicians would see things the same way instead of blowing the incident out of proportion to suit their own ends. If they had stayed out of the situation and left the Army to deal with its own people in its own way, the whole thing would probably have been forgotten already, he thought to himself..Juanita saw the expressions on Bernard's and lay's faces. "Are you claiming that we're any more violent or barbaric than your societies? We've never had a war. We've never dropped bombs on-houses full of people who had nothing to do with the argument. We've never burned, maimed, blinded, and blown arms and legs off of people who just wanted to live their lives and who never harmed anybody. We've never shot anyone who didn't ask for it. Can you say the same? Okay, so the system's not perfect. Is yours?".After that brief moment of frenzy, the viper slithered loose of its own tangles and flowed swiftly across temporary emotional paralysis. All her life, until now, Geneva Davis had always found exactly the right.Lechat nodded reluctantly. "Well, it sounds pretty final, I guess."..blacktop.. "Now," says Donella, "before I take your order, honey, are you sure you've got the money to pay?".Until now, Micky hadn't noticed this deformity. "Everyone's got imperfections," she said..but fear for her one good hand caused her to choose the nether end.. "Stop," Micky said, dismayed to hear the word come out with a harsh edge. Then more softly: "Just.For a moment Driscoll thought the machine had read his mind. He blinked in surprise, then realized it was impossible--just a coincidence. "How can I?" he said. Class and style without pretension. "Exactly.".. "It couldn't fire anyway," Kath replied. "It's wiodifications aren't completed yet We've already toli~4ou that". "Isn't that a Hawaiian name?" Micky asked..The rosebush, however, responded perversely to tender care. In spite of ample sunshine, water, and."Yes, but that situation can't last. If the Army doesn't get them soon, the Chironians will."..earth has cracked open to release a terrible presence that is spreading its dominion over all the world. A.Hunted and the Would-Be Chameleon. This isn't a published work, of course, although in the boy's mind.. "Leilani Klonk."..The Chironians traded in respect, Colman was beginning to understand as he listened to the talk around him. They respected knowledge

and expertise in every form, and they showed it. Perhaps, he thought to himself, that was how the first generation had sought to compete and to attain identity in their machine-managed environment, where such things as parental status, social standing, wealth, and heritage had had no meaning. And they had preserved that ever since in the way their culture had evolved.. "Hey, how come you never told us about that part?" he asked as the girl led Swyley away..CHAPTER EIGHT.She should have grown drowsy, at least lethargic, but her mind hummed more busily than the traffic, and.SOME DAYS SINSEMILLA stank like cabbage stew. Other days she drifted in clouds of attar of.As a matter of emotional survival, she had recently been making an effort to keep her anger sheathed.To the faithful canine, the boy says, "Stay here, girl. I'll be back soon..". "Who?" Driscoll asked automatically, tossing his cigarette butt into the incinerator and snatching up his gun. A cover in the top of Wellington's chest slid aside to reveal a small display screen on which the figures of Sirocco and Colman appeared, viewed from above. They were walking at a leisurely pace, along a corridor, talking to a handful of Chironians who were walking with them. Driscoll resumed his former posture, and moments later footsteps and voices sounded from along the wider corridor leading off to the right, and grew louder..Another zoom shot revealed that the man delivered by the Jaguar was Congressman Jonathan Sharmer..The features behind the other's visor remained unsmiling. "Mister Fallows to you, Sergeant." The voice was icy. "I'm sorry, but I have work to do. I presume you have as, well. Might I suggest that we both get on with it." With that he clasped the handrails of the ladder, stepped backward off the platform .to slide gently down to the level below, and turned away to rejoin the others..When Jay called that morning Adam had told him to invite as many Terrans as he wanted. Jay reached Colman at the school that the Army was using as a temporary barracks in Canaveral City, but Colman started to explain that he had set the afternoon aside for other things--in fact he'd intended to find out more about Port Norday from the Chironian computers. However, he changed his plans when Jay mentioned that Kath would be there to see her grandchildren. After all, Colman reasoned, he couldn't have hoped for a better source of information on Port Norday than Kath. As Hanlon was off duty, Colman had invited him along too..Noises in his wake suggest that the killers are trying to track him. Contentious voices quickly arise as the..drink..smells threatening or at least suspicious..Stormbel was a short, stocky, completely bald man with pale, watery eyes and an expression that never conveyed emotion. A thin moustache pencil-lined his upper lip. He put his hands on his hips and stared for a few seconds at the gaping faces before him. "This Congress is dissolved," he announced in his thin but piercing, high-pitched voice. "The Mission is now under the direct command of the Military." He turned his head to Borftein "You are relieved of command of both the regular and Special Duty forces. Those functions are now transferred to me..".In this deep quiet, Micky gradually became aware of the whispery sputter-sizzle of burning candle.Nevertheless, standing erect, the boy wishes the trucker would go away, but he can't think of a thing to..cotillion.. Hanlon roared and slapped his thigh..A short silence fell, and the deadlock persisted. Then Marcia Quarrey turned from the window, where she had been staring down over the Columbia District. "You're right, but you're supposed to pretend you don't know about that. I was thinking of something else--recognition. It's another part of human nature that surfaces when the more basic things have been taken care of. And when it does, it gets to be just as powerful as the rest. A guy needs to think that he measures up when he compares himself to the other guys around him. He needs to be recognized for what's good about him and to stand out. Like you said, it's probably sex, because he thinks the girls are taking notice, but whatever the reason, it's red..".consoling words for any situation, had known when she could smooth your hackled heart just by lovingly..Sometimes dear Mater came complete with a mess to clean up. Leilani could handle messes. She didn't..The process had been the same all through history, and it was happening again. The latest four-year-old news from Earth described the rapid escalation of the latest war against the New Israel of the South. Only this time the EAF was getting involved. The Western strategists had interpreted it as an EAF policy to provoke an all-out war all across Africa so they could move in afterward and dose up on Europe from the south. Apparently the idea was to try and take over the whole landmass of Asia, Africa, and Europe. Why did they want to take over the whole of Asia, Africa, and Europe? Colman didn't know. He was pretty sure that most of the people killing each other back there didn't

want the territory and didn't care all that much who had it. The Howard Kalenses were the ones who wanted it, just as they wanted everything else. Perhaps if they'd learn how to get along with people without being scared to turn their backs all the time and how to make love with their own wives in bed, they wouldn't need geographical conquests. And 'yet they could tell everybody it made them better than the people were, and the people believed it..CHAPTER TEN.at once wonders if this is a wise choice..The hunter has a handsome, potentially genial face. The unit was one of a hundred or so set in clusters of four amid palm like trees and secluding curtains of foliage which afforded a comfortable measure of privacy without inflicting isolation. The complex was virtually a self-contained community, and was known as Cordova Village. It included a large, clover-shaped, open-air pool and an indoor one by the gymnasium and sports enclosure; a restaurant and bar adjoined a spacious public lounge that doubled as a game room; for recreation a laboratory, a workshop, and art studios, all fully equipped; and an assortment of musical instruments.
