Stanislaw took a long draught from his glass and made a what-the-hell? gesture. "My grandfather stayed alive in the Lean Years by ripping off Fed warehouses and selling the stuff. He could bomb any security routine ever dreamed up. My dad got a job with the Emergency Welfare Office, and between them they wrote two sisters and a brother that I never had into the system and collected the benefits. So life wasn't too bad." He shrugged, almost apologetically. "I guess it got to be kind of a tradition... sort of handed down in the family..". When Noah stopped at the corner, the Navigator halted half a block behind him. The driver waited to.. windows, until the pie-powered trucker returned and they ventured out upon the road again. Even then.. "Sure they can. Even before Dr. Doom, Sinsemilla was footloose. She says we lived in Santa Fe, San.. "Thank you," Merrick said, pouncing on the opportunity to conclude. "I agree with and endorse your assessment. Very good, Fallows. Enjoy your leave." Merrick turned to one side and began tapping something into the touchboard below the screens.. "You really wanna know?" An intense note had come suddenly into Driscoll's voice.. Chapter 8.. STILL NO OVERTURE came from the Chironian leaders. The Chironian who seemed to direct a lot of what went on at Canaveral, the main shuttle base outside Franklin, stated that he didn't report uniquely to any individual or organization that approved his actions or gave him directions. So who told him how the place was to be run? It depended. He originated requests for things like equipment and new constructions because he knew what the base needed. How did he know? Because the people in charge of capacity planning and traffic control told him, and besides, it was his job to know. On the other hand, the companies that built the shuttles and other hardware worked out the technical specifications because that was their business, and the customers took care between them of the priorities of the missions to be flown from the base. He stayed out of that and did his best to support the schedules they said they needed. So ultimately, who was in charge? Who told whom to do what, and who did it? It depended. Nothing made any sense.. Most self-mutilators were deeply self-involved. A small number could be confidently diagnosed as.. He touched her brow. She didn't twitch or even so much as blink in response.. CHAPTER TWENTY.. Borftein looked surprised, hesitated for a second or two, and then nodded as he realized what Lechat wanted. lie rose slowly to his feet and paused to collect his words. "I am proud to have been accepted as worthy of command by the troops whose valor, determination, and fighting ability we have all witnessed," he said. "I will not attempt to elaborate with speeches what we owe, since words could never express our debt. They have all discharged their duties in a manner true to the best traditions of the Service, and many of them with a bravery beyond the call of duty." He paused, and his face became more solemn. "However, although we can never and will never forget, our commitment to the new future of understanding that we are -beginning to glimpse leaves no place for the perpetuation of an organization dedicated to ways that belong to the world we have all left behind us. All military personnel are therefore relieved of further obligations to the Mission's military command and discharged with full honors, and that command is disbanded forthwith." The hall remained quiet while Borftein sat down. It was a moment of final realization and resignation for many of the Terrans; while the future held its prospects and promises, there would be new and strange changes to adapt to, with the sacrificing of much that was familiar.. unoccupied. He settled into the booth farthest from the door.. also burned from her all illusions. She didn't entertain fantasies derived from the movies or from any other.. After stripping down to panties and a tank top, she sat in bed, atop the sheets, sipping cold lemon vodka.. "You could clarify yourself right into a casket..". What troubled Fulmire was the specter of Kalens's emerging from the midst of it all as a virtual dictator, with Borftein supporting him and straining to be let off the leash. Every faction would see such a concentration of power as a potential battering ram to be harnessed exclusively for the advancement of its own cause, and even more as an instrument to be denied at all costs to its rivals. In an explosive situation like that anything could happen, and Fulmire had visions of the whole Mission tearing itself apart in internecine squabbling with a strong possibility of bloodshed at the end of it all when frustrations boiled over. The only force that he could see with any potential for exerting a stabilizing influence was the more moderate consensus as represented by the Mayflower I's population as a whole; and Lechat, possibly, could provide a means of

mobilizing it before things got out of hand. IN A FAINT and inconstant breeze, waves stir through the lush meadow. At this lonely hour, in this. Micky finished her coffee in long swallows, as though she had forgotten it wasn't spiked, and though she. In the kitchen, after quietly closing the door behind himself, he holds his breath, listening. The house is. "Yeah, I can see why you'd want to do that. But you've got to know what one question I can't avoid." "It couldn't fire anyway," Kath replied. "It's wiodifications aren't completed yet We've already toli~4ou that". "Stay.. . there!" the girl instructed.. She stifled another giggle and said to the boy in a lower voice, "Come on, let's put another one outside the Graphics lab. They crept away and left Driscoll staring across the corridor at the imperturbable robot.. "First, let's recap the main points. The primary object is to get into the Communications Center and secure it while the transmission goes out, and after that to hold it and hope that enough of the Army reacts quickly enough to take the pressure off, Okay?" There were no questions, so Sirocco continued. "The big risk is that SD reinforcements will be brought up from the surface, If that happens, they'll have." "I don't think you're taking enough account of the psychological effects on our own people," he said when he finally looked up. "Morale is high now that we're nearly there, and I don't want to spoil it. We've encouraged a popular image of the Chironians that's intended to help our people adopt an assertive role, and we've continually stressed the predominance of younger age groups there." He shook his head. "Heavy-handed methods are not the way to deal with what would be seen now as essentially a race of children. We'd just be inviting resentment and protest inside our own camp, and that's the last thing we want..watched from any window. Beyond the open back door lay a deserted kitchen dimly revealed by the. Not trusting herself to speak, Micky shook her head, which was the first admission she had ever made. "You could be right, but that's long-term," Lechat replied. It's-it's all wrong.. ". Sirocco frowned and rubbed his nose. "I'm not convinced. Celia looked up again, but Stern's eyes had taken on a faraway light. "Chiron has made fools of the weak, who deluded themselves that it would play by their civilized rules, and now that the weak have fallen, the way is left clear for those who understand that nothing imposes Earth's rules here. In fact, to be honest, I can't see Congress's being around all that much longer. On that planet down there, it's a dodo already.. ". Jarvis appeared

Suddenly in the doorway beside Chazure. "Three companies in battle order have arrived at the Spindle and are heading forward, and more are on their way from the Ring," he announced. "Also there is a detachment from the Battle Module coming up one of the aft feeder ramps. They must be coming back to close the lock." Extracting the cheese tray from the refrigerator, Micky said, "Are you cooking for a cellblock full of 'I'd be opposed,'" said Geneva, brandishing a carrot stick..buried in the woods of Montana.. "Nine. But I'm precocious. What's your name?". Colman shook his head slowly. There had been too much to think about in too little time. It was always the same; whenever the pressure was at its highest, there was invariably one thing that everybody missed because it was too obvious. They had all been so preoccupied with thinking of how to stop Sterm from getting into the Battle Module that none of them had allowed for the obvious possibility of his being there already..your head, just like in mine. "It slipped," it announced. "Sorry about that, boss. I've wired off an order for a replacement..". At that moment the communications supervisor called out, "We have an incoming transmission from the Battle Module." At once the whole of the Communications Center fell silent, and the figures of Sterm and Stormbel, flanked by officers of their high command, appeared on one of the large mural displays high above the floor. Sterm was looking cool and composed, but there was a mocking, triumphant gleam in his eyes; Stormbel was standing with his feet astride and his arms folded across his chest, his head upright, and his face devoid of expression, while the other officers stared ahead woodenly. After a few seconds, Wellesley, Lechat, and Borftein moved to the center of the floor and stood looking up at the screen.. "What do you do best?" Ci asked him. "I mean . . . apart from holding people's walls up for them. That can't be much of a life..". The Chironian scientists had not so much advanced past theft terrestrial counterparts; rather, as perhaps was not surprising in view of the absence on Chiron of traditional habits of thought or. authorities whose venerable opinions could not be challenged until after they were dead, they had gone off in a totally unexpected direction. And some of the things they had stumbled across on theft way had left Pernak astounded..protect the precious bottom that his mama once talcumed so lovingly..When he glanced back, he noticed a Lincoln Navigator pulling away from the curb across the street, no
