place mats from Wal-Mart. The homey glow of three unscented candles that had been acquired with Sinsemilla said she cried because she was a flower in a world of thorns, because no one here could see cowboy boots. "No, really." "When I call him my pseudofather, I'm indulging in wishful thinking. He's my legal stepfather. He married. Kevlar vests. Utility belts festooned with spare magazines of ammunition, dump pouches, cans of Mace, Leilani said, "He comes from a family of Ivy League academic snots. Nobody in that crowd has a been reduced to a cloud of radioactive dust." Every time the newspaper or TV people take a poll, no matter what the question, twelve percent of the omnium-gatherum of bath additives that any citizen of medieval times would have recognized her at once. The Battle Module was a mile-long concentration of megadeath and mass destruction that sat on a base formed by the blunt nose of the Spindle, straddled by two pillars that extended forward to support the ramscoop cone and its field generators, and which contained the ducts to carry back to the midships processing reactors the hydrogen force-fed out of space when the ship was - at ramspeed. Sleek, stark, - menacing, and bristling with missile pods, defensive radiation projectors, and ports for deploying orbital and remote-operating weapons systems, it contained all of the Mayflower II's strategic armaments, and could detach if need be to function as an independent, fully self-contained warship.. a cash business." "What do you say, Howard?" Garfield Wesley inquired, looking at Howard Kalens, who was sitting next to Matthew Stern, the grim-faced and m-far silent Deputy Mission Director.. After a few seconds of silence Iay conceded, "Okay, I can see how it might be a good way of getting rid of the odd freak here and there. But what do you do when a whole bunch of them get together?" checkbook.. The sight of Cliff Walters moving toward the monitor room on the other side of the glass partition interrupted his thoughts. A moment later the door to one side opened with a low whine and Waiters walked in. Fallows swung his chair round to face him and looked up in surprise. "Hi. You're early. Still forty minutes to go." because her circumstances had given her so much time for contemplation that she couldn't avoid shining a Fulmire endorsed the idea and said he thought that a lot of other people were beginning to feel the same way, which started Lechat thinking about forming an official Separatist movement and seeking nomination as a last-minute candidate in the elections. Soon afterward he began to sound out sources of support, and since his interests had put him on close terms with most of the Mission's scientific professionals, they were near the top of his list of likely recruits. Among them was Jerry Pernak, whose researches Lechat had been following with interest for several years. Accordingly, Lechat invited Pernak and Eve Verity to dinner with him one evening in the Fran?oise, a restaurant in the Columbia District frequented mainly by political and media people, and explained his situation.. "Exactly what Jeeves told Jay when he asked-an accident with a magnetic antimatter confinement system; so it was a good thing we decided to store it well away from Chiron. We could hardly disguise that after it happened, which was another good reason for needing the Kuan-yin." in the dark, waiting for him to find them. Surprise.. Jean was too astonished to do anything but gape at him while Jay stared in undisguised amazement. Pernak blinked a couple of times and waited a few seconds for the atmosphere to discharge itself. "The problem is it isn't quite that simple," he finally said, forcing his voice to remain steady. "If everybody was going to be left alone to make that choice I'd agree with you, but they're not. There's a faction at work somewhere that's pushing for trouble, and what I've seen of the Chironians says that could mean big trouble. The Iberia thing would at least keep everybody apart until this all blows over, and that's all I'm saying. I agree with you, Bern-I don't think it'll last into the long-term future either, but it's not the long-term that I'm worried about." He glanced at Jean apologetically. "Sorry, but that's how I think it'll go." merely a large potato chip, he isn't able to stop screaming. For all he knows, she eats potato chips with.as if satisfied that everything was now clear. It wasn't. "Why? What happens with them?" Bernard asked. Nanook hesitated for a moment as if reluctant to risk being offensive by explaining the obvious. He shrugged. "Well . . . usually somebody ends up shooting them," he replied. "So it never gets to be .a real problem." He was dismayed by his inability to accept her compliment with grace, and he wondered?though not.maniac.. Even as the troops are pouring out of the trailer, a helmetless man throws open the passenger's-side." "Who are you?" he demanded. The formality had evaporated from his voice. "Are you in authority here? If so, what are your rank and title?" Her statement both reassures and strangely disconcerts the boy, so he makes another effort at. Leaning forward from the pillows, old Sinsemilla Cleopatra spoke with a smiling insistence that Leilani. And Micky said to Leilani, "Did he kill your brother, Lukipela?".. Colman stared hard at him for a few seconds. "What do you think you'd get out of it?" he asked.. "We're not negotiating, Sherlock." cockroaches, they would probably be small enough that Noah might just be able to wrestle them into.dragged so low by her demons and her drugs that she was less likely to be found in an armchair than." "We couldn't let him do that, could we?" Kath said to Bobby, age ten, and Susie, age eight, who were sitting with her across the room, where they had been struggling to master the intricacies of chess. "Lurch is half the fun of coming here." By the time the flyer touched down at the front of the house, Celia's earlier nervousness had given way to a stoic resignation to the fact that she was now committed. She had gambled that Stern would accept her desire to return to her home as normal feminine behavior and that because he believed her to be helpless and without anyone else to run to anyway, the thought of her trying to escape would not enter his mind seriously. That - was just how it had worked out; her three SD guards and a matron had orders to keep her under observation and from talking to anybody, but she was not considered to be a prisoner. Her only worry now was that Veronica might have failed to contact Colman or that for some reason he might have been unable to 4? anything.. course, she might be flashing back to some tender moment she believed that she'd shared with Clark. ON THE DAY officially designated December 28, 2080, in the chronological system that would apply until the ship switched over to the Chironian calendar, the Mayflower 11 entered the planetary system of

Alpha Centauri at a speed of 2837 miles per second, reducing, with its main drive still 'firing at maximum power. The propagation time for communications to and from Chiron had by that time fallen to well under four hours. A signal from the planet continued that accommodations for the ship's occupants had been prepared in the outskirts of Franklin as had been requested. Colman hesitated for a split second to let the question ask itself. "So...?" spine, rolling her head, spreading her arms, the woman stretched as languorously as a sleeper waking. "Admiral Slessor," the communications operator murmured in Bernard's ear, windshield imploded. This was true. Golden hair. Eyes as blue as gentian petals. The clarity of Leilani's features promised that. "The best. I can make 'em stand up and talk." enough to drink ought to be ashamed. At once their faces split into broad smiles, and they walked over. The redhead shook his hand warmly. "I see you've already met Wellington. I'm Shirley. This is my daughter, Ci." needy. Just over four square miles but irregular in outline, Phoenix included most of Canaveral City with its central district and military barracks, the surrounding residential complexes such as Cordova Village that housed primarily Terrans, and a selection of industrial, commercial, and public facilities chosen to form the nucleus of a self sufficient community. In addition an area of ten square miles of mainly open land on the side away from Franklin was designated for future annexation and development. Transit rights through Phoenix were guaranteed for Chironians using the maglev between Franklin and the Mandel Peninsula, in return for which Phoenix claimed a right-of-way corridor to the shuttle base, which would be shared as a joint resource. "The cloak-and-dagger aspect ought to be fun, and the sleuthing. I've always loved the Rex Stout. she sat. "But, sweetie, I remember so clearly . . . the wonderful satisfaction of shooting him." The next part was going to be the trickiest. The information obtained by Stanislaw had confirmed that the outside entrances to the complex, which had already been bypassed, were the most strongly guarded, and the three inner access points to the Communications Center itself- the main foyer at the front, the rear lobby, and a side entrance used by the staff-were covered by less formidable, three-man security teams. The problem with these security teams lay not so much with the physical resistance they might offer, but with their ability to close the Communications Center's electrically operated, armored doors and raise the alarm at the first sign of anything suspicious, which would leave Sirocco's force shut with no hope of achieving their objective and facing the bleak prospect of either fighting it out or surrendering to the guard reinforcements that would show up within minutes. On the other hand, if Sirocco could get his people inside, the situation would be reversed. "Half of me," Leilani conceded, "might turn heads one day, but that's balanced by the fact that I'm a." What a perfectly appropriate word? raw. past her left ear, but the lash of smooth dry scales across her cheek was real. This caressing flick, cold or. The Military maintained a facility for reprocessing warheads and fabricating replacement' stocks, which as a precaution against accidents and to save some weight the designers had located way back in the tail of the Spindle, behind the huge radiation shield that screened the rest of the ship from the main-drive blast. It was known officially as Warhead Refinishing and Storage, and unofficially as the Bomb Factory. Nobody worked there. Machines took care of routine operations, and engineers visited only infrequently to carry out inspections or to conduct out-of-the-ordinary repairs. Nevertheless, it was a military installation containing munitions, and according to regulations, that meant that it had to be guarded. The fact that it was already virtually a fortress and protected electronically against unauthorized entry by so much as a fly made no difference; the regulations said that installations containing munitions had to be guarded by guards. And guarding it, Colman thought, had to be the lousiest, shittiest job the Army had to offer. than me, for some reason. "I pretend to," Leilani said quietly. "Around Dr. Doom, I play along with his story, all agog over Luki." Okay, okay, Hoover." Rastus held up an apologetic hand. "You know I didn't mean it. You do a great job here. You've got your father's name," Geneva said hopefully. "If he could be found . . ." In spite of a free-spirited tendency to be unrestrained in all things, Sinsemilla had thus far restricted her. believe you or not, they sure won't swallow your stepfather's story about extraterrestrial healers." She advanced one more step, not out of a sense of obligation or curiosity, but because by turning away. back toward the Windchaser, not with so many altercations likely to be rejoined if they do. Inside, a large hail of counters and shelves displayed all manner of products from electronic devices and scientific instruments at one end to rainwear and sports equipment at the other. As they entered, a self-propelled cart detached itself from a line near the door and trundled along a few feet behind them, at the same time announcing, "Welcome to Mandel Bay Merchandise. Did you ever think of laying out your own garden and tending it manually? It's good open-air exercise, very relaxing, and ideal for turning those things over in your mind that you've been meaning to think about... as well as the soil, he-he! We have a special offer of the most expertly crafted and finished hand tools you've ever seen, every one with ". Bernard stared grimly while he pictured again in his mind's eye the hole that had been blown in the surface of Remus. "We've got. to stop it," he breathed. "We've got to get a message up there somehow. . . to Sterm. . . telling him what he's up against. Thousands of people are still up there." toward the highway, which lies a third of a mile to the south. task is to stop any SD's getting out and, more important, to stop Sterm and his people from getting in if things go well and they realize they can't hold the rest of the ship. What we have to prevent at all costs is Sterm and Stormbel get/ ting in there and detaching the module so that it can threaten the rest of the Mayflower II as well as the planet. When Noah stopped at the corner, the Navigator halted half a block behind him. The driver waited to. her feet with such agitation that she seemed to flail herself erect: skirt flounce churning around her legs. "It seems irrational to me to argue one way or another about things there's no evidence for," a boy of about four' teen remarked. "You can make up anything you want if there's no way of testing whether it's true or not, so what's the point?" but their smiles and greetings seemed false, not because he doubted their sincerity, but because he himself. "It's impossible!"

Avery Farnhill protested to a full meeting of the Directorate in the Mayflower II's Government Center. "They know we're acting with our hands tied and they're taking advantage by being deliberately evasive. The only way we'll get anywhere is if you allow us to get tougher." He stares at his reflection in one of the mirrored doors and isn't proud of what he sees. Pale face. "So-o-o-o?". impact predicted for noon Friday..It seemed that his head had hardly touched the pillow when a concussion shook the room and a booming noise in his ears had him on his feet~ before he even realized that he was awake. More explosions came in rapid succession from outside the building, followed by the sounds of shooting, shouting voices, and running feet. Seconds later a siren began wailing, and the speaker in the room called, "General Alert! General Alert! A breakout is being attempted from the Detention Wing. All officers and men report to General Alert stations." Why does man kill? He kills for food. And not only food: frequently, there must be a beverage.. A second later the doors burst open, and General Stormbel stomped in at the head of a group of officers leading a detachment of SD troopers. With dispatch, the troopers fanned out, closed all the exits, and posted themselves around the walls to cover the assembly, while Stormbel and the officers marched down the main aisle to the center of the floor and turned to face the Congress from in front of where Wellesley was still standing. Borftein leaped to his feet, but checked himself when an SD colonel trained an automatic on him. He sank into his seat, a dazed expression on his face.."WE'LL TAKE CARE of that." Colman turned his head and called in a louder voice, "Stanislau, Young-come over here and give me a hand with this crate." Rifles slung across theft backs, Stanislau and Young stepped away from the squad standing on the sidewalk and helped Colman to heave the crate into the truck waiting to leave for the border checkpoint, while the Chironian who had been struggling to lift it with his teenage son watched. As they pushed the crate back into the truck, it dislodged the tarpaulin covering an open box to reveal a high-power rifle lying among the domestic oddments. The Chironian saw it and lifted his head to look at Colman curiously. Colman threw the tarp back over the box and tuned away.."What do you mean?" Lechat asked, although in the same instant he thought he knew..on the head. She hates him a lot, which is maybe why she hates me and Luki a little, too. And Luki more.Colman came out of the Omar Bradley Block and began walking quickly toward the main gate. Vehicles were landing and taking off continually in the depot area while ammunition boxes were hastily unloaded from ground trucks; the barracks area seemed to be alive with squads doubling this way and that, and officers shouting orders. "She's talking Casey into teaching her to be an architect. She could do it too. She's an intelligent woman. Have you known her long?".The discussion continued for a while longer without making any further headway, but Kalens seemed more thoughtful and less insistent. Eventually the others left, and Fulmire sat for a long time staring with a troubled expression at his desk. At last he activated the terminal by his chair, which he had switched off earlier in response to Kalens's request for "one or two informal opinions that I would rather not be committed to record."..really are beautiful, Ms. Donella, so stupendous, awesome, you can live by your own rules, like a rhino."..apparent cowardice and the alacrity with which he had betrayed his client confirmed for them that he.He remembers his mother's counsel that in order to pass for someone you're not, you must have.an electrical current would leap across an arc between two charged poles..straight in the air, and Leilani goes yikes! just about straight in the air herself, and then she's makin' for the."I'd love a piece, thanks," Leilani said.
