The display showed the target command bunker at the bottom of the gorge, known enemy weapons emplacements as computed from backplots of radar-tracked shell trajectories, and the locations of observation and fire command posts from source analysis triangulations of stray reflections from control lasers. On it the cool water of the stream and its tributaries stood out as black lines forking like twigs; the rock crags and boulders were shades of blue; living vegetation varied from rust brown on the hills to deep red where it crowded together along the lower slopes of the gorge; and shell and bomb scars glowed from dull orange to yellow depending on how recently the explosions had occurred..No, sir," Colman replied stiffly, keeping his eyes fixed straight ahead. Moments later, optical interdiction shells began exploding just below the curtain of smoke and spewed out clouds of aluminum dust to disrupt the enemy control and communications lasers. Ahead of the attacking troops, a concentrated point barrage of shells and high-intensity pulsed beams fired from the fairing platoons rolled forward along the trail to clear the way of mines and other antipersonnel ordnance. Behind the barrage the Third Platoon leapfrogged by sections to provide mutually supporting ground-fire to complete the work of the artillery. There was no opposition.
